Devops with 20 years of experience in designing and delivering web contents and applications. Proficiency in Vanilla JavaScript and ES Next, understanding of its quirks and best practices.

- Good understanding of JavaScript libraries and framework
- Excellent understanding of HTML5 and CSS3
- Experience working with CSS pre-processing like SASS
- Excellent understanding of browser rendering behavior and performance
- Good understanding of cross-browser and legacy compatibility issues
- Good understanding of Node.js and build tools (Bun, Bundlesjs, Webpack, npm)
- Good understanding of Git workflow
- Experience with component-driven design and design systems (Figma, Storybook)
- Experience with plugin development (Wp, Ckeditor) and Chrome Extensions.

A Fine Arts background directly informs a rigorous, detail-oriented approach to UI/UX.

Strong design-system thinker who moves fluently from visual specs to pixel-perfect production code.

Proven track record architecting report builders that eliminated manual workflows and refactoring legacy codebases.

Passionate about transforming complex requirements into elegant, maintainable, and well-tested solutions, with proven success in plugin development for Ckeditor, ag-Grid and Rappid.

EXPERIENCES

May 2021 — Jul 2024

Milan, Italy

Senior Frontend Engineer

Sumo Logic

Architected a proprietary report builder in React.js that eliminated manual reporting workflows.

Built and documented a reusable component library in a custom Storybook env, accelerating team velocity and enforcing UI consistency.

Profiled and optimised rendering, state management and bundle size to deliver smooth ux at scale.

Established Jest unit testing to significantly reduce long-term technical debt.

Aug 2019 — May 2021

Milan, Italy

Senior Frontend Engineer

DFLabs

Developed data-visualisation and search interfaces with ag-Grid and React for high-density security datas.

Optimised state management and rendering pipelines to maintain fluid ux on large, real-time data volumes.

Collaborated with BE team on API design and resilient error-handling patterns for mission-critical features.

Jan 2012 — Jun 2019

Milan, Italy

Frontend Developer
DigitApp

*Leading advertising campaigns for mobile VAS products, designed and implemented mobile-first sites.
Achieved uplift in conversion rates through optimised responsive landing pages and improved tracking pipelines.
Coordinated graphics and managed supplier relationships; built custom CMS on top of WordPress.
Developed end-to-end features from UI implementation to REST API integration;*

Jan 2006 — Dec 2011

Milan, Italy

Webmaster
Zeng

*Managed minisites and produced mobile content for AC Milan, Juventus, and Lecce.
Videomaking for national tv commercials.*

Jan 2003 — Dec 2007

Milan, Italy

Flash developer
Kora

*Developed interactive Flash content and animations for Vodafone advertising campaigns.
Handled brand design, graphic production, and video editing workflows on Mediaset Jumpy.*

EDUCATION

- 2025 **UX/UI Design Certification**
Epicode
- 1999 **Bachelor of Fine Arts (110/110)**
Brera

LANGUAGES

-  **Italian**
Native
-  **English**
B1 writing / listening
B2 reading

SKILLS

ENGINEERING

- React.js
- JavaScript ES6+
- HTML5 / CSS3
- Performance
- Jest
- Storybook

DESIGN & UI

- Figma
- Design Systems
- UI/UX Design
- Accessibility
- Adobe Illustrator
- Photoshop

WORKFLOW

- AI-Assisted Dev
- Git
- REST APIs
